 jQuery Strapi (Headless CMS) MySQL REST API Figma
 Agile

PROFESSIONAL EXPERIENCE

My Portfolio / Full-Stack Development

Vancouver, BC Jun. 2022 - Aug. 2022 • 3 months

My portfolio is the site using Angular as the front-end and Strapi (Headless CMS) as the back-end.

- The Strapi exposes REST APIs and Angular consumes them in the front-end through microservices.
- I created branding with a logo, design, and color scheme from the scratch.

Bench Bakery / Full-Stack Development

Vancouver, BC Mar. 2022 - May. 2022 • 3 months

Bench Bakery is a microservices based e-commerce web application that helps hungry people to order easily.

- I built both the front-end and back-end.
- For the front-end, I created the logo and designed the website.
- For the back-end, I built client server architecture with REST APIs and stored procedures that connect to MySQL.

Sprites & Selkies Daycare / Front-end Development

Vancouver, BC Dec. 2021 - Mar. 2022 • 3 months

Sprites & Selkies Daycare is an institution for 6 months to 6 years old children. I did the branding with the logo and designed the website from scratch.

- The daycare sought for fantasy and mythology-looking website.
- However, listening to the client's story, I directed them to effective and search-engine-optimized branding.
- I implemented CSS animation and jQuery to give impressive websites.

Otani University / Public Relations Specialist

Kyoto, Japan Apr. 2013 - Jul. 2021 • 8 years and 4 month

I was working in the planning and admission department. I was mainly in charge of public relations by communicating with team members and multiple stakeholders.

- I was in charge of the production of school informational pamphlets including 120 pages.
- I was doing project management to keep the projects running smoothly.
